### **DETAILED ACTION**

Receipt is acknowledged of the IDS filed on July 31, 2003 which has been considered and placed of record in the file.

Claims 1-10 are presented for examination.

This application has been filed with formal drawings which are acceptable to the examiner.

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by German Patent Publication'10029138.

With reference to Figure 1, GPP'138 discloses the claimed invention including: a) a first transmitter and receiver means 5 disposed on the hand tool; b) a storage means 3 disposed on the hand tool for storage of an authorization code; c) a control electronics 2 on the hand tool 1 in electrical communication with said storage means and said first transmitter and receiver means; and d) a second transmitter and receiver means 7.

Please note that when key 8 of the second transmitter 7 is actuated, it produces

Art Unit: 3723

wireless transmission to change the operation state of hand tool 1 from unlock to lock position.

Please further note that the examiner did not treat the "means" language as the 6<sup>th</sup> paragraph means plus function. Furthermore, the alternative language "or" does not require the prior art to perform the change of the authorization code.

***Allowable Subject Matter***

4. Claim 10 is allowed.
5. Claims 2-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. The following is a statement of reasons for the indication of allowable subject matter: the specific limitation of "said first signals ... authorization code information" are not anticipated nor made obvious by the prior art of record in the examiner's opinion.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bayley'6,409,064, Holcomb et al.'6,374,649 all disclose tool box with remote locking ability. Losey'6,677,851, Lee et al.'6,091,340, Bishop'6,644,888, and Weiss'6,130,621 all disclose method of enabling and disabling certain functions of an automobile. Dawson et al.'5,873,276 and Kokubu'5,801,614 all disclose key entry electronic combination lock.
